Acknowledgments

Finally this thesis is ready! It was a long journey and it would not have been possible without many people. First of all, I would like to thank my supervisor Prof. dr. ir. H.J. Heeres for his valuable guidance and countless support during my PhD time. Erik, thank you for giving me an opportunity to be a PhD student in your group. It was a pleasure to work with you day by day, discuss all scientific aspects and a lot of different things. Thank you for all that I have learned from you.

Special thanks go to my reading committee, Prof. Anna Maria Raspolli Galletti, Prof. dr. Francesco Picchioni and Prof. dr. J.G. (Hans) de Vries for spending their precious time to read and correct my manuscript.

I acknowledge the Dutch CatchBio Program, part of the Smart Mix Program of the Netherlands ministry of Economic Affairs and the Netherlands ministry of Education, Culture and Science for financial support. I am grateful to our project partners from Utrecht University: Prof. dr. ir B.M. Weckhuysen, dr. P.C.A. Bruijninx, dr. W. Luo and dr. J. Ftouni. Thank you for all performed experiments, fruitful discussions, comments and contribution to publications.

While performing experiments, I sometimes had problems with high pressure reactors. I was lucky to be able to solve these problems fast and effective because of our technical team. I would like to express my gratitude to Marcel de Vries, Anne Apeldoorn and Erwin Wilbers for all technical help, suggestions and ideas that they gave me during my PhD. Special thanks go to Erwin Wilbers for all additional experiments which you did for me, that is priceless. I would also like to thank Marya de Jonge for all support with administration. And big thanks to all of you for the nice and warm Christmas dinners, barbeque, hardlopen and summer events.

I would like to thank Jasper de Haan, my only student during my PhD. Thank you for your hard work with the packed bed reactor, night shifts during long term experiments and countless number of experiments. Special thanks for your Master thesis, that was very helpful while writing my thesis.

My PhD time at the University of Groningen was challenging, but it was also interesting, fun, and happy, thanks to my dear colleagues and ex-colleagues. Here I would like to acknowledge them too. Thank you guys for all sweet moments of my PhD: Maria Jesús Ortiz Iniesta, Zheng Zhang, Arjan Kloekhorst, Ionela Gavrilă, Ignacio Melián-Cabrera, Leon Janssen, Esteban Araya, Rodrigo Araya, Patricio Raffa, Shilpa Agarwal, Jan Henk Marsman, Laurens Polgar, Agnes Ardiyanti, Yusuf Bin Abu Ghazali, Yuehu Wang, Yin Wang, Miftahul Ilmi, Louis

Daniel, Lidia Lopez Perez, Jenny Soetedjo, Boy Arief Fachri, Ria Abdilla, M. Iqbal, Joost van Benekom, Jan Willem Miel, Martijn Beljaars, Eric Benjamins, Cynthia Herder, Angela Kumalaputri, Susanti, Diego Wever, Frank van Maastrigt, Bilal Khan Niazi, Leon Rohrbach, Sjoerd van der Knoop, Claudio Toncelli, Teddy Buntara, Andrew Phua, Graham Ramalho, Arne Hommes, Inge Noordegraaf, and Arjen Kamphuis. I am sorry in advance if I forgot to mention any names. It is not because I do not appreciate your help and our communication but because I was so lucky to met so many people in RuG.

I would like to thank Jos Winkelman and CB Rasrendra for their great help with papers and kinetic modelling. Thank you for all fruitful discussions and all modeling work that you have done.

Separate and endless thanks go to my paronymphs: Leysan Yousupova and Henk van de Bovenkamp. Henk, it was so interesting to share an office with you! Thank you for all discussions (not only about work), your support day by day, your help with HPLC, kinetic modeling and for many-many other! Leysan, I am so lucky that we met a long time ago! Thank you for your positive view of the world and sharing the information about all nice night places in Groningen. Thank you both for being my paronymph and I am sure that will be fun!

My heartfelt thanks also to my Russian and Ukrainian friends which I met in Groningen. Thank you guys for everything: climbing, nice evenings, barbeques, parties and all great time in Gro. I really appreciate our friendship and hope that the distance between Groningen and Delft will not be too long. I love you all guys. Special thanks go to people who are going to read this Thesis completely!

I would thank all my colleagues from Kiwa as well. Thank you for your support during the last step of my PhD, for the warm welcome in Kiwa and for everyday work with you.

Certainly, I would like to thank my family for constant support and help. Мама, спасибо за то, что всегда веришь в меня. Thanks to all people who became my family a couple of years ago. You are awesome and supportive! Special thanks to Alex for his support, help, believe in me and love. To marry you was the greatest decision in my life. And of course thanks to Alice that she allowed me to finish my PhD. She was a big part of the writing process and probably one day she would like to read this Thesis.

Anna Piskun
